EDUCATION

ENGINEERING
Enseeiht - INP Toulouse
2026 - Today

CPGE : MPSI - PSI
Ecole des Pupilles de l'Air
2024 - 2026

HIGHSCHOOL
Lycée Yves Leborgne
2021-2024

As an electronics engineering student with strong programming skills in MATLAB and C, I aim to work on embedded systems within the aeronautics and defense sectors. My profile is enriched by unique travel experiences: exploring South America and Africa by truck for three years, and sailing the Caribbean for a year. These adventures developed my curiosity, autonomy, and open-mindedness—qualities I now apply to complex engineering challenges.

EXPERIENCE

SCOTTISH CASTLE VOLUNTEERING JUNE - AUGUST 2026

Scotland - Highlands

Volunteered for two months at a Scottish castle to fully immerse myself in a native English-speaking environment. This proactive experience significantly enhanced my English fluency while demonstrating my adaptability and communication skills.

ENGINEERING INTERN AT AIR ANTILLES MAY - 2022

Guadeloupe - Pointe-à-Pitre

Completed a one-month immersion internship at Air Antilles in Guadeloupe, rotating through various engineering departments to gain a comprehensive understanding of airline technical operations. i

EXPERTISE

- Embedded Systems
- Analog & Digital Electronics
- Automation
- Signal Processing
- Intercultural Communication
- Adaptability & Autonomous Problem-Solving
